

Low Power Digital IC Senior Design Engineer (m/f)

Hardware Development

**Success stories don't just happen.
They are made.**

“Made by Bosch” stands for outstanding quality of a global player. Profit from the multitude of career opportunities in an internationally positioned company.

Bosch Sensortec GmbH in Reutlingen provides micro-mechanical sensors and the respective applications for the market of consumer electronics. The young organization is a full subsidiary of the Robert Bosch GmbH, the pioneer and the world's largest manufacturer of micro-mechanical sensors.

Your tasks:

- Development of digital circuit modules in modern CMOS process technologies
- Implementation of data path and controller modules for sensor signal processing on RTL level
- Functional verification and assertion of system performance
- Possibly digital backend (synthesis, STA)
- Support of test development

Your profile:

- Very good knowledge of digital and analog signal processing
- Very good knowledge of analog and mixed signal design
- Experience in VHDL / Verilog design
- Experience in measuring technique
- Specialist
- Very good command of English
- Ability to work in a team
- Intercultural competence
