## **BNO055** Technical Highlight

The BNO055 is a System in Package (SiP) that integrates a triaxial 14-bit accelerometer, a triaxial 16-bit gyroscope with a range of ±2000 degrees per second, a triaxial geomagnetic sensor, and a 32-bit microcontroller that runs the company's BSX3.0 FusionLib software.

## Quaternion

- Linear Acceleration
- Rotation
- Gravity
- Robust Heading

## A Use Case: Kevin's Robot

The BNO055 sensor can be used for innovation at all levels; from building a small robot, to the construction of an advanced drone. In fact, Kevin, a fellow Bosch Sensortec engineer created a smart robot called Crusoe with the BNO055. Crusoe detects his surroundings and can avoid obstacles in order to navigate his way through any terrain.

## Parameter of the Sensor

The BNO055 has a form factor of 5.2 x 3.8 x 1.1mm<sup>3</sup>, which is significantly smaller than any comparable discrete or system-on-board solution.

# **BNO055**

Sensors and sensor fusion in a single package

Bosch Sensortec

Invented for life

# The BNO055 Limitless Possibilities

A milestone in the field of sensor technology: the BNO055. The new innovation from Bosch Sensortec – an absolute orientation sensor with the combination of sensor and sensor fusion all in one single package. The BNO055 is unique due to the infinite possibilities of its applications; from amateur robotics, to the Internet of Things, the BNO055 is accessible and valuable to a variety of users. Use cases are limitless as the BNO055 leads the way in developing a community between professional engineers and makers alike; in order to create whatever comes to mind.

## Applications

- Robotics
- Drones
- Industry 4.0
- ► IoT
- Indoor Navigation
- Augmented Reality

## What Makes the Sensor Unique

By integrating both sensors and sensor fusion in a single package, the customer is liberated of the need for multivendor solutions. This sensor makes quick integration into corresponding systems possible; as a result, the customer can focus on product innovation, which allows for faster time to market. The BNO055 is the only intelligent sensor on the market that provides a turn-key solution for the customer to efficiently enable a wide range of applications.

### Components

- Acceleration Sensor
- Gyroscope
- Magnetometer
- ► 32-bit Microcontroller
- Sensor Fusion Algorithms ▶ Size: 3.8 × 5.2 × 1.1 mm<sup>3</sup>
